

Pumpkin Pepitas F₁ AAS Edible Winner

The newest All-America Selections award winning pumpkin, Pepitas, is a winner in both the decorative and culinary arenas. Pepitas is named for its hullless or naked seeds (pepitas) that lack the tough outer hull making them easy to eat after slow-roasting. Pepitas are a delicious and nutritious treat, with many health benefits! Each high yield plant produces numerous, uniform medium sized (9 – 12 lb) pumpkins on healthy, disease resistant vines. This confectionary type of pumpkin produces beautiful orange fruits that at maturity have decorative green stripes. What an interesting change of pace for your fall decorations.
