

Brussels Sprouts Hestia F₁
AAS Edible Regional Winner
Regions: SE, M/SW

Hestia is only the second Brussels Sprouts ever to be granted an AAS Winner designation. This is an excellent flavored trendy and popular vegetable with a bright green exterior and smooth, dense yellow interior. The erect plant maintains its nice habit throughout the season and was judged notably more uniform than comparison varieties. Hestia tolerates much cooler temperatures and the flavor improves deliciously when the temperatures dip into the 30's.

AAS® Winner Data

Genus species: *Brassica oleracea*

Common name: Brussels Sprouts
