

**Osteospermum Akila® Daisy White F<sub>1</sub>  
**AAS Bedding Plant Winner****

White osteospermums are not unique but a clear white osteo with a yellow center is a novelty, plus, it's easily grown from seed. Akila® Daisy White is a tidy, uniform plant with open flowers that produces non-stop blooms all summer long. Even southern judges praised Akila's ability to keep blooming in the heat and they also showed more drought tolerance than other osteos.
