

Pepper 'Cajun Belle'
AAS Vegetable Award Winner

There's Cajun flavor in this southern belle. Peppers are both sweet and savory. The fruit look like small bell peppers about 2" x 3" with 3 or 4 lobes. Early to mature, look for mature green peppers 60 days after transplanting into your garden. When left on the plant, fruit will change color from green to scarlet and finish red, filled with vitamin C. 'Cajun Belle' plants produce a high yield of peppers due to vigor and excellent fruit set. Compact plants are two feet tall and wide, a perfect stature for containers. When grown at AAS Trial grounds, 'Cajun Belle' showed no disease problems. 'Cajun Belle' was bred by Grow Star L.L.C. and seed companies can purchase seed from PanAmerican Seed Company. Gardeners will be able to purchase seed or plants from their favorite retailer.
