

**Snapdragon 'Twinny Peach' F₁
AAS Flower Award Winner**

Who took the snap out of Snapdragon? 'Twinny Peach' the AAS Winner, is a snapdragon without the snap. Why? Because it is a double or butterfly flower form that does not have the jaws or joints to snap. The double flower form is the origin for the name 'Twinny' or twins. Another unique quality is the blend of peach tone colors. The soft shades of peach, yellow and light orange are distinct, and no other snapdragon offers this range of colors. Match 'Twinny Peach' with blue tones of *Salvia farinacea* or purple foliage plants and your garden will be a knockout. In the full sun garden, 'Twinny Peach' will produce abundant flower spikes, plenty to cut and place in vases for fresh indoor bouquets. Plants will continue to flower all season with little garden care. Like all snapdragons, 'Twinny Peach' is easy to grow and it exhibited heat tolerance in the AAS Trials. This new variety was bred by HEM Genetics.

AAS® Winner Data

Genus species: *Antirrhinum majus*

Common name: Snapdragon

Unique qualities: First double flowered snapdragon with compact habit. Unique color.

Flower color: Pastel shades of peach, yellow and light orange
