

Gypsophila Gypsy White Improved
AAS Ornamental from Seed Winner

Semi-double blossoms on this new, improved variety of gypsophila will make your garden sparkle! Not only are the flowers semi-double, but are also a bit larger in size and produce more flowers per plant, resulting in a fluffy white mound of beauty. Gypsy White Improved has better branching and a better growth habit than its predecessor, making it perfect for containers, small spaces and garden beds. A much longer bloom season and better heat tolerance than Gypsy Compact White will make this your new garden favorite. Overall it is a beautiful little plant with many possibilities!
