

**Corn, sweet American Dream**  
**AAS Edible Winner**

AAS Judges selected American Dream as their top trial choice and it just so happens to come from the same company that introduced Honey 'N Pearl, an AAS winner from 1988. In a tight trial, American Dream was pitted up against Honey 'N Pearl and came through as the winner! With its excellent germination, very tender, super sweet kernels, this newbie will make a great addition to the home garden. American Dream matures slightly earlier than the comparisons and produces vigorous, healthy plants with cobs that have good tip fill of bi-colored kernels. Plants grow 6-7 feet tall and mature in 77 days after planting seed. Perfect fresh, roasted, grilled, canned or frozen.
