

Impatiens New Guinea Florific™ Sweet Orange F₁ AAS Bedding Plant Winner

Huge 2" blooms in beautiful shades of light orange against dark green foliage create a giant impact in the garden, especially in shade or semi-shaded areas where color is needed. The natural disease tolerance of a New Guinea Impatiens is a welcome addition to a plant that boasts such beautiful flowers on a compact plant perfect for small space gardens.

AAS® Winner Data

Genus species: *Impatiens hawkeri*

Common name: New Guinea impatiens

Unique qualities: Perfect for brightening gardens or patio containers in partial to full shade. Plants produce masses of large, uniquely bi-colored flowers in shades of light salmon to deep orange. Naturally branching plants quickly fill beds and are perfect for planting 'en masse'. With resistance to impatiens downy mildew it is the perfect alternative for shade gardens where the disease is a concern. Unlike traditional impatiens, it will not succumb to Impatiens Downy Mildew and will, instead, provide reliable, bright color in the garden all season long.

Flower color: Light salmon and orange bicolor

Foliage color: Dark bronze-green

Flower size: 2 inches

Plant type: Annual

Garden location: Shade to partial sun

Length of time from sowing seed to flower: 12-13 weeks

Closest comparison on market: Divine Orange (green leaf), Divine Orange (bronze leaf)
