

Kale Prizm F₁
AAS Edible Winner

Dreaming of growing the popular superfood kale but think you don't have room? Look no further than our newest 2016 AAS Winner Kale Prizm F₁. When grown, Prizm produces attractive short, tight ruffle edged leaves that are content to be grown in containers as well as in-ground beds. Their easy to maintain, almost stemless stalks are quick to re-leaf so harvest early and often for a continual supply throughout the season. The excellent tasting, almost nutty flavored leaves are tender enough to enjoy in fresh salads but also hold up well when cooked. Prizm is a foodie gardener's dream come true!
