

Pepper Flaming Flare F₁
AAS Edible Winner

Most Fresno peppers are considered rather finicky plants that typically grow better in warm and dry climates. The fact that Flaming Flare is an AAS National Winner means it performed well in all AAS trial sites. The fruit is ideal for making chili sauces and the heat of that sauce will increase depending on how late in the season the peppers are harvested. Flaming Flare is an exceptional pepper that was sweeter tasting than similar Fresno types and consistently produced larger fruits and more peppers per plant. Yet another AAS Winner that culinary gardeners should consider for their kitchen gardens.

AAS® Winner Data

Genus species: *Capsicum annuum*

Common name: Fresno pepper

Fruit size: 3.75 x 1 inch, 1 ounce

Fruit shape: Triangular pointed
