

Zinnia 'Profusion Double Hot Cherry' AAS Bedding Plant Award Winner

Another addition to the Profusion series, 'Double Hot Cherry' offers an abundance of vividly colored deep-rose double flowers. This continuous bloomer covers attractive compact mounded plants from late spring through fall. In trials the dramatic large double blooms held the color significantly better than comparisons and later into the season. The plant covers spent blossoms giving a much fresher appearance without deadheading. Mature plants 8-14 inches tall are perfect as a low or medium height divider. This excellent garden performer also offers disease resistance to Alternaria and powdery mildew.

Bred by Sakata Seed Corporation
