

Tomato, Cherry 'Jasper' F1
AAS Vegetable Award Winner

Excellent taste, a long harvest window and outstanding performance in the trials contributes to this tomato's success. Judges liked the texture and sweetness of the tomato as well as the uniformity of the fruits that grow on vigorous, healthy plants. 'Jasper' is a high yielding variety with fruits that stay on the vine then hold well after ripening both on the vine and post-harvest. Vigorous vines require little or no fertilization. An added bonus is high disease resistance to Late Blight, Fusarium races 1, 2 and Early Blight plus the ability to overcome weather-related stresses.

AAS® Winner Data

Genus species: *Solanum lycopersicum*

Common name: Cherry tomato

Unique qualities: Superior eating quality and taste

Fruit size: 1", 7-10 grams

Fruit color: Uniform red

Plant height: 7 feet

Garden location: Full sun

Length of time to harvest: 60 days from transplant, 90 days from sowing seed

Disease resistances: Late Blight, Early Blight, Fusarium races 1, 2

Closest comparisons on market: 'Suncherry Premium' F1, 'Juliet' F1, 'Sweet Baby Girl' F1

Fruit shape: Round

Plant type: Vigorous indeterminate

Plant width: 3 feet when staked

Garden spacing: 1-2 feet
