

**Zinnia 'Profusion Double Deep Salmon'**  
**AAS Bedding Plant Award Winner**

An abundance of salmon colored double flowers cover attractive compact mounded plants from late spring through fall. In trials the dramatic double blooms offered a unique salmon color that held the color better and later into the season than the comparisons. The brightly foliated plant covers spent blossoms giving a much fresher appearance without deadheading. Mature plants 8 to 14 inches tall are perfect as a low or medium height divider. This very good garden performer offers disease resistance to Alternaria and powdery mildew.

Bred by Sakata Seed Corporation
