

Petunia Wave Carmine Velour F1

This newest color of the popular Wave® petunias evokes adjectives like Fabulous, Stunning and Vibrant and will become a favorite in your garden. Large 2-2.5 inch flowers literally cover the easy-care spreading plants that rarely need deadheading because new blooms continuously pop-up and cover the spent blooms. Wave® is an excellent landscape performer and does equally as well in containers or hanging baskets as it does in the landscape.
