Nasturtium Baby Rose

Exciting news! The last nasturtium AAS Winner was back in the early days, in the 1930's. Now it's time to introduce a wonderful rose colored nasturtium perfect for today's gardens. Baby Rose is a petite-flowered, mounding variety with healthy, dark foliage ideal for containers and small space gardens. Their compact habit means less "flower flopping" with their blooms remaining upright throughout the season. The rose color is uncommon in nasturtiums, and contrasts beautifully with the dark-green foliage. Bonus: both the leaves and flowers are edible!
