## Echalion Crème Brulee (BGS-270) F1

This echalion is the first ever shallot to win the AAS Winner designation so it's exciting to see such a beautiful and great tasting variety join the ranks. Growing a shallot from seed is fun and unexpectedly easy. Easy to peel, single-centered bulbs have a bright coppery pink outer skin and a pretty rosy purple interior with thick rings. The sweet tender bulbs are earlier to mature than the comparisons and have a slight citrusy flavor when eaten raw. When caramelized, things get even better as the natural sugars are enhanced and do not leave any overpowering aftertastes. A fantastic variety for the home gardener.

### **AAS® Winner Data**

**Genus species:** *Allium cepa*

**Common name:** Echalion

**Fruit size:** 4-5 inches

**Fruit shape:** Oblong

**Color:** Pink

**Plant height:** 24-36 inches
