## Pepper Pot-a-peño F1

Pot-a-peño is a fun new jalapeno pepper with a compact habit perfect for growing in containers and hanging baskets. Plentiful small, green jalapeño fruits have a traditional spicy zip that is great in any dish where you want a little punch of spice. Simply leave the fruit on the vine a few extra weeks and they will ripen to red for a sweet, spicy flavor. This variety is earlier to mature than other jalapenos giving you a head start on your garden's harvest. A unique trait of Pot-a-peño is how the fruit hangs down beneath the plant making it very easy to harvest without damaging the appearance or productivity of the plant. A dense foliage canopy makes for an attractive addition to your patio or balcony garden.
