

Eggplant Icicle F1

This cylindrical white eggplant earned the prestigious AAS award for several reasons. Its improved taste and texture have universal appeal, whether fresh or cooked. The pure white skin does not tend to yellow like many other white varieties of eggplant. The 7 inch fruits have fewer seeds than comparable varieties. The large, durable and vigorous plants hold up to insect damage and the environment. And, the Icicle plant has fewer spines than most eggplants, making for a less painful harvest!

AAS® Winner Data

Genus species: *Solanum melongena*
