

Petunia Bee's Knees

Outstanding and eye-catching! Each Bee's Knees plant is filled with 3" lush blooms that put on a colorful show of deep yellow, non-fading flowers all season long. The intense yellow petunia color contrasts beautifully against the deep green leaves. Bee's Knees offers great garden performance in a variety of conditions and requires very little maintenance. Gardeners will love its deep, rich yellow color and its versatile mounding habit. Works great as an element in mixed containers or as a hanging basket but also thrives as a long-blooming groundcover.
