

Celosia Flamma Orange

Flamma is coming in hot! Get ready to bring some fiery orange color to your garden with Flamma (“The Flame”) celosia. This compact variety has numerous branches, each with a strong flower plume, as well as secondary blooms, which give a long show of color in the garden. AAS Judges were impressed with the superior garden performance and how well it stood up to hot, humid and rainy conditions during the trial season. Not only does Flamma have exceptional heat tolerance but also stuns with its early flowers that won’t fade. Whether you decide to grow this in beds or in containers (it was trialed in both) you will have a great show of orange color all season long
