

Pepper Dragonfly F1

Dragonfly pepper plants produce beautiful purple peppers that have thick, sweet walls, unlike the thin papery walls of other purples on the market. Similar to the beloved dragonfly that flits around your garden, this pepper transforms itself from a green pepper into a purple fruit that is as delicious at the green stage of maturity as it is when fully purple and mature. Overall, a much better purple color than comparisons with above average, robust pepper flavor. Fruits are held high on the plant, keeping them from the soil. The 4-lobed fruits do not fade and if left on the vine, turn a beautiful, bright red color.

AAS® Winner Data

Genus species: *Capsicum annuum*

Common name: Sweet Pepper

Fruit size: 3.5 inches

Fruit shape: Blocky Bell

Color: Purple

Plant height: 24-36 inches

Plant spread: 24-36 inches

Plant habit: Upright

Garden location: Full sun

Garden spacing: 36 inches

Length of time to harvest: 75 days from transplant

Closest comparisons on market: Pinot Noir F1, Islander F1
