

Tomato Purple Zebra F1

Purple Zebra tomato is a fun new addition to striped tomatoes, producing tomatoes that are rich with complex flavors and a moderately firm texture. Dark red fruits with green stripes and a deep mahogany red interior do not produce muddy coloration like other tomatoes of this type. The taste is sweet and acidic leaning to sweet. Overall, this tomato has a better taste and thinner skin than comparisons with excellent disease resistance. Judges in the know say this is a very marketable fruit for farmers' market growers.

High disease resistance to ToMV, Verticillium Wilt Va/Vd, Fusarium Wilt Race 1, Leaf Mold A-E, Late Blight PH2/PH3 and intermediate resistance to TYLCV and TSWV.

AAS® Winner Data

Genus species: *Solanum lycopersicum*

Common name: Tomato

Fruit size: 2 - 2.5 inches

Fruit weight: 3 – 4 ounces

Fruit shape: Round

Color: Purple with green stripes

Plant height: 5 – 6 feet, requires staking

Plant spread: 2 feet

Plant habit: Upright

Garden location: Full sun

Garden spacing: 24 inches

Length of time to harvest: 80-85 days from transplant

Closest comparisons on market: Bronze Torch F1, Black Zebra

Tested Nationally & Proven Locally®
