

## Tomato Sunset Torch F1

You might just carry a lifelong torch for this cute new tomato! Sunset Torch has strong, dramatic striping from stem to tip. This is a very vigorous grower and was the first to ripen in multiple regions. As one judge explains the appeal, "The open growth habit displays fruit that pleases the eye before reaching the mouth!" Overall better performance, less splitting, good yields, a mildly sweet, fruity flavor and disease resistance make this cutie a winner. Sunset colored fruits are produced on easy-to-harvest trusses. High disease resistance to ToMV, Verticillium Wilt Va/Vd, Fusarium Wilt Races 1 and 2 and intermediate resistance to TY-LCV and TSWV
