

Torenia Summery Love Pure White F1

Summery Love Pure White is a new torenia variety that wowed the judges for its pure white coloration that sported larger blooms than the comparisons. This variety bloomed consistently over a long, wet, hot and humid summer and showed better vigor and health than other similar varieties that are currently available. "This [is a variety that] should be used in mass plantings for a great showing!" stated one judge. At only 8 inches tall, Summery Love maintains a compact plant over the season but has more branches and more flowers for a durable show of pure white color.
