

Torenia Vertigo Deep Blue F1

Torenia Vertigo is a brand new F1 Torenia ideal for both containers and the landscape. AAS Judges were impressed with the number of flowers on each plant and the vibrant non-fading blue petals that contrast beautifully with the sky blue and yellow centers. This torenia performed exceptionally well in warmer climates such as in the Mountain/Southwest and Florida. Torenia Vertigo has a compact habit, flowers for a very long period of time and has glossy green foliage. The large blooms do not fade even when exposed to strong sunlight.
