

Tomato Apple Yellow F1

If you've never tried an apple-shaped tomato, now is the time. This AAS Winner offers incredible garden performance, a uniquely dimpled apple-shaped fruit with a deliciously sweet citrusy taste and firm, meaty texture. Indeterminate 5' tall vines produce abundantly in clusters, resulting in up to 1,000 fruits per plant. The fruits are an eye-catching, bright, lemon yellow color reminiscent of the "Big Apple's" taxi-cab colors. Judges were excited that a non-splitting, long-holding, uniformly shaped tomato had such good eating quality. With just the right balance of sugar and acid flesh in a firm exterior, Apple Yellow would be perfect stuffed with a savory cheese for a delicious appetizer.
