

Tomato Celano F1

Celano is a patio type grape tomato with a strong bushy habit. It is best grown with some support, such as a tomato cage. This semi-determinate hybrid tomato is an early producer of sweet oblong fruits weighing about 0.6 oz. each. Plants grow to 40" in height and spread to 24" and have excellent late blight tolerance. In comparing it to other grape tomatoes on the market, one judge summed it up by saying "(Celano) is sweeter, the texture is better, the color is deeper, the plants are healthier, and the yield is phenomenal."
