

Tomato Early Resilience F1

Early Resilience is a rounded Roma tomato with a deep red interior color, uniform maturity and good quality flesh for canning and cooking. Determinate, bushy plants can be staked but it is not necessary. The AAS Judges noted that this variety was very resistant to Blossom End rot, resulting in a high yield and less fruit loss. Similar great taste as the comparisons but a much healthier plant and fruits. (See long list of disease resistance below) Overall, this is an excellent variety that would be a home canner's dream. This could very well replace some of the other Roma varieties as a new standard in the arena, or maybe "colosseum" of Roma tomatoes!

AAS® Winner Data

Genus species: *Solanum lycopersicum*

Common name: Tomato

Fruit size: 2 inch long, weight 3-3.5 ounces

Color: Red

Plant height: 18-24 inches

Plant habit: Bushy, staking optional

Garden location: Full sun

Garden spacing: 2 feet

Length of time to harvest: 115 days from transplant
