Tomato Buffalosun F1

All that an heirloom has to offer but better! Buffalosun shone in the trials with fruit that had a better texture than the comparisons (Margold and Striped German), a higher yield and less cracking. This indeterminate tomato should be staked for best garden performance and you will be rewarded with fruits long into the season. The unique yellow with red/orange flame coloration is beautiful on the outside and results in a nicely marbled interior. Good tasting sweet, tender flesh gives the look of an heirloom without the mushiness often associated with heirlooms. Buffalosun also outlasted the comparisons when disease hit in late summer, notably thanks to its late blight resistance. Fun fact: Buffalosun exhibited good locule development. What's a locule? That space between tomato sections where the seeds and gel are formed.

AAS® Winner Data

Genus species: *Solanum lycopersicum*

Common name: Tomato

Fruit size: 4 x 2 inches, 18-20 ounces

Color: Yellow with red flames

Plant height: 5-6 feet

Plant habit: Indeterminate, staking recommended

Garden location: Full sun

Garden spacing: 19 inches

Length of time to harvest: 110 from sowing seed, 70 days from transplanting

Disease resistance: High resistance: Fusarium:1,2,3; Verticillium albo-atrum wilt: 1; Verticillium dahliae:1 / Intermediate resistance: Late blight; Tomato Spotted Wilt: 0

Closest comparisons on market: Margold F1, Striped German
