Nasturtium Tip Top Rose

Tip Top Rose is a strong yet compact nasturtium with unique and showy rose-colored flowers showcased above medium green foliage. These 14x18” mounded plants were more floriferous than the comparison varieties in the AAS trials, producing a bigger and better garden show. The uniquely colored flowers are a great addition to the nasturtium family since they don’t fade as they age. Judges described the color as “a warm, bright rose with less of the black undertones typical in nasturtium flowers.” Tip Top Rose remained healthy throughout the season. It makes a great winter annual in warmer climates and a spring annual in other areas, in containers or in the landscape. The whole plant stayed uniform and healthy whereas other varieties struggled. Bonus: This nasturtium is great for pollinator gardens and both the leaves and flowers are edible!

AAS® Winner Data

Genus species: *Tropaeolum minus*

Common name: Nasturtium

Flower color: Rose

Foliage color: Green

Flower size: 2 inches

Bloom time: Summer to frost

Plant height: 15 inches

Plant type: Annual

Garden location: Full sun to partial sun

Garden spacing: 20 inches
