Tomato Galahad F1

Yes Sir! Galahad is a brave new tomato variety that has a high level of Late Blight resistance because both parents are resistant. In this case, one plus one equals a very strong two! Galahad is a high-yielding, great tasting tomato that grows on a strong sturdy plant. Judges agreed that the sweet, meaty flavor is better than that of the comparison varieties and boasts of being crack resistant. Broad shoulders (just like Sir Galahad?) and large, clean fruits grow on a highly productive, disease-resistant plant. Certainly, a variety you'll want to use in your battle for tomato greatness.

AAS® Winner Data

Genus species: *Solanum lycopersicum*

Common name: Tomato

Fruit size: 3 inch fruits, weight 12 ounces

Color: Red

Plant height: 4 feet

Plant habit: Determinate, compact
