

Marigold Siam Gold F1

Growing this marigold in your garden is like taking a trot around the globe! Siam Gold has beautiful, mounded foliage that produces globe like, fully double golden flowers all season long. The large flowers are held on top of sturdy stems and above the foliage for full color visibility making a striking focal point in the garden. Blooms were very tight and held up all summer long. Siam Gold is excellent for cut flowers but no staking is needed. Try this beauty for a staycation where no travel is needed!
