

Pepper Red Impact F1

Lamuyo-type peppers are notoriously difficult to grow, but the new Red Impact variety is here to change that. This AAS Winning pepper is easy to grow and produces thick, sweet walls, even when green. It is also much sweeter than other varieties and loaded with fruits for a high yielding gem. Red Impact plants are upright and tidy, with a strong disease package that protects your investment. The fruit is dark red, highly uniform in shape and size, and if you are looking for a delicious and easy-to-grow pepper, Red Impact is the perfect choice for you.
