

Kohlrabi Konstance F1

Praise for Konstance! She holds steadfastly in the garden to give a longer harvest window for kohlrabi fans. This new purple kohlrabi has an improved smoother skin and an attractive, vibrant purple color that extends out through the leaf margins. No matter if you grow in spring or fall, Konstance continues to produce flavorful crunchy bulbs that are crack-resistant and long-lasting. A bonus to the crisp, sweet, peppery bulb is that the leaves are also highly flavorful when roasted or sauteed or, eat them raw when the leaves are young and tender.

AAS® Winner Data
