

Pepper Pick-N-Pop Yellow F1

If Peter Piper picked a peck of poppin' peppers, you'll be pleased to plant some peppers too!

Why? Because once you harvest the Pick-N-Pop yellow peppers you are going to want to pop them in your mouth! These are cute, snack-sized mini peppers that are extra sweet with just the right amount of juiciness and crunch. They produce continuously on a moderate sized plant with outstanding bacterial leaf spot resistance and produce a prolific number of bright, canary yellow-colored, uniformly shaped peppers.
